SOLUTIONS & SERVICES**

OESGROUP.COM

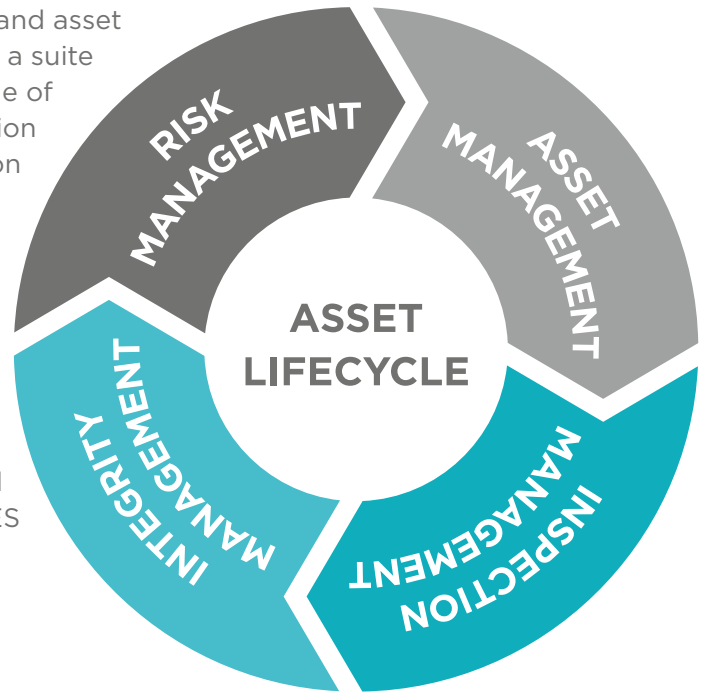

WHO ARE OES?

OES are the global leader in inspection, rectification and asset support solutions to the Oil & Gas industry. Providing a suite of specialist services that span the life cycle of a range of assets and facilities, from the planning and construction stage, reactivation and through all phases of operation and maintenance, right until decommissioning.

Technology remains at both the forefront and background of OES' services, as we continue to develop and incorporate key technologies throughout our internal systems as well as offering cutting edge solutions to our clients.

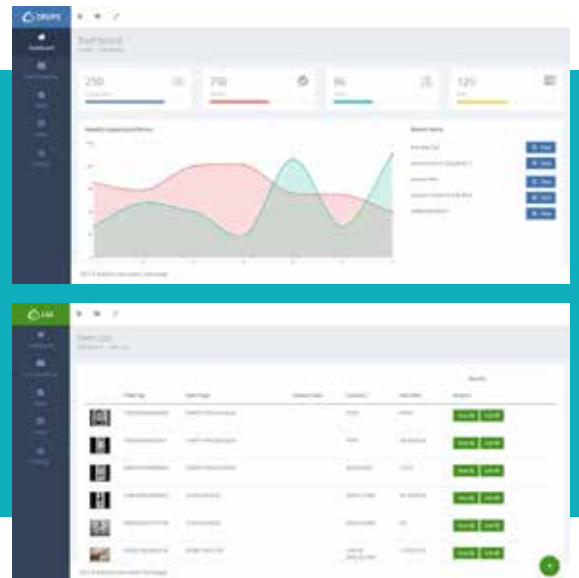

With a network of 14 offices strategically located around the world, providing high quality services and reporting, excellent support and experienced staff, OES are the first choice for Asset Integrity Management.

INTRODUCING ARCUS

The ARCUS Platform provides a technologically innovative solution to completing Inspections in the challenging environments of the Oil & Gas Industry.

Using the latest Zone 1 & Zone 2 ruggedised tablets, the ARCUS suite of services utilises RFID Tags for Asset Identification through a pre-defined Inspection process with photographic evidence of inspection. The data is then synchronised to a cloud based portal, to provide near real time reporting to onshore management. The Multi-level security framework ensures your inspection data is secure and ARCUS fully integrates into all existing mainstream ERP and Maintenance Management Systems your company operates such as SAP, Oracle, JDE and Maximo.

AUDIT & COMMISSIONING SERVICES

Pre Contract Audits and Condition Surveys

PM System Audits and Gap Analysis

Commissioning

Factory Acceptance Testing

Facility Audits

PROJECT SUPPORT SERVICES

Project Management and Assistance

Compliance Auditing, Condition Auditing and Gap Analysis against Shipyard Scope

Auditing of Shipyard Facilities

5 Yearly Crane, BOP Handling System and Lifeboat Davit Inspection and Load Testing

Dropped Object Specialists

Vibration Analysis

Drone Inspections

Light (LUX) Surveys

Ladder and Fall Protection Surveys

PRV Gauge, Registers & Identification Tagging

Infrared Thermographic Surveys

MEET THE CHAIRMAN

OES Executive Chairman,
Richard Upshall

OES has always been at the forefront of technology, all the way back in 1996, our first reporting program ran in FoxPro. We then developed into MS Access and went online. At first we put this on the World Wide Web as it was then known, and developed a customer access portal. OES has always been the act to follow, and we have watched our competitors mimic our programmes over the years and compliment our ongoing developments.

The last year or two has seen OES once again step away from the competition with the new Arcus 4 suite of programs developed in partnership with Askaris, which include **ArcusDrops**, **ArcusLGI**, **ArcusEX**, **ArcusHose**, **ArcusBolt** and **ArcusBOP** and further apps are being developed during 2019. There is nothing like it in the market, and we don't feel there will be for some time.

DISCOVER OES

OES has offices and representations worldwide located on all the major flight paths, so we can mobilise quickly. There are no restrictions on where we will work.
