

OES QA Manual		
Revision No.: 24	Document Title: QMS-001 Group Quality Manual	Revision Date: 18-May-21
Document Status: Approved		Page: 1 of 1

2.2 Quality Policy

The prime objective of the Management of OES is to provide personnel, equipment and associated services in a manner that whilst conforming to contractual and regulatory requirements, result in a service and end product that is second to none.

In order to achieve this objective, it is the policy of OES to establish and maintain an efficient and effective Quality Management System planned and developed in conjunction with all Management functions designed to eliminate the occurrence of deficiencies and generate continuous improvement in both operation and customer focus. Determination of conformance of work, to contractual and regulatory requirements, is verified on the basis of objective evidence of quality.

OES Quality Assurance Manual, and the procedures outlined therein, describes how the Quality Management System is designed to ensure that all quality and regulatory requirements are recognized and that a consistent and uniform control of these requirements is adequately maintained. OES Quality Assurance Manual also defines how effective control is established.

It shall be the responsibility of OES Management to ensure that a consistent and uniform control of these requirements is adequately maintained.

It shall be the responsibility of OES Management to ensure that all relevant procedures are available, understood and consistently and regularly reviewed, to reflect current Client expectations and company philosophies, whilst complying with the relevant national and international standards.

It shall, similarly, be the responsibility of all employees to ensure that the Quality Management System of OES is fully implemented during the course of their day-to-day activities and normal working practices.

Joseph King
General Manager
